# WHERE GIS MEETS ENTERPRISE

## OUR MISSION

Our mission is to help asset-intensive organizations improve workflow performance through the strategic integration of Enterprise Systems.

#### **GEOWORX SYNC**

Synchronizes data between Esri ArcGIS and your Enterprise Systems.

### **GEOWORX OFFICE**

Delivers enterprise functionality to your Esri ArcGIS Online map.

### GEOWORX MOBILE

Mobile solution for Work and Asset Management systems.

### GEOWORX SKETCH

A comprehensive redlining system used to enhance communication and collaboration throughout your enterprise.

## ABOUT US

GeoNexus Technologies is the industry leader in providing commercial off-the-shelf software for integrating Geographic Information Systems (GIS) and Enterprise Systems. Our products are maintained and supported by our expert staff, with over 20 years of integration experience.

## OUR PARTNERS

We partner with industry technology leaders including ABB<sup>®</sup>, Ericsson<sup>®</sup>, Esri<sup>®</sup>, IBM<sup>®</sup>, Oracle<sup>®</sup>, and SAP<sup>®</sup> to provide easy-to-use integration software and solutions. For information on becoming a partner with GeoNexus Technologies, contact us at: partners@geo-nexus.com.

## GEOWORX® SYNC

## ABOUT GEOWORX SYNC

GeoWorx Sync is a powerful tool for synchronizing data that is shared by multiple Enterprise Systems.

### SAVE MONEY

GeoWorx Sync allows you to personally configure your data to suit your needs, saving you money.

### SAVE TIME

While custom integrations can take months or years, GeoWorx Sync can be installed and configured in minutes!

### COMPLEX EDITING

GeoWorx Sync can be configured to handle a number of complex GIS editing scenarios.

### FULLY SUPPORTED

GeoWorx Sync is fully supported and maintained by GeoNexus' expert staff.

## SYNC DATA BETWEEN YOUR GIS AND ENTERPRISE SYSTEMS

Organizations use a variety of enterprise systems to manage data. In many cases data related to customers, assets, work, and resources is replicated across Enterprise Systems and quickly becomes unreliable due to an undefined system of record. GeoWorx Sync solves this issue by synchronizing common data stored and managed by independent Enterprise Systems.

## CLIENTS SAY:

"The GeoWorx Sync tool has been surprisingly fun to set up and our Work and Asset Management team has picked it up quickly!"

- Jeremy Williams, IT Manager - City of Clearwater, FL
